

The In Harm's Way PowerPoint presentation was created as the core curriculum for the In Harm's Way Training Programs for Health Professionals which was designed to assist health professionals in understanding and preventing toxic threats to child development.

The presentation includes slides and notes based on the Greater Boston Physicians for Social Responsibility (GBPSR) report, *In Harm's Way: Toxic Threats to Child Development*. The report is a peer-reviewed and extensively referenced compilation of current knowledge on the effects of toxic chemicals on child development, and has been endorsed by some of the leading researchers in this field.

The presentation is created in MS PowerPoint™ in three separate files on CD-ROM. It is adaptable for use with various health provider audiences. You will notice that some slides and text are marked as optional, and are intended for use in more advanced/detailed discussions. Please see the Notes View to read notes and references. Overheads or 35 mm slides may be made from the PowerPoint file. The overheads, along with a printout, can be ordered directly from GBPSR.

Companion training materials are available from GBPSR to supplement this presentation. This includes an In Harm's Way: Toxic Threats to Child Development Training Manual for Health Professionals. The materials in the Training Manual are intended to allow you to educate yourselves, your colleagues, and your communities about toxic threats to child development and how to prevent exposures to harmful chemicals. The Training Manual includes journal article abstracts, a primer for the clinician, and a series of fact sheets for health care providers and patients on preventing toxic threats to child development.

The authors of the presentation do not authorize changes, and are not responsible for the accuracy of material if changes have been made. GBPSR grants permission to reprint properly credited excerpts from this presentation. Photography and illustrations should not be reproduced without permission. The full In Harm's Way report is available to be reviewed, ordered, or downloaded in PDF format at the GBPSR website at <http://www.igc.org/psr/>.

To order copies of overheads or printouts from the PowerPoint presentation, complete Training Manuals, or related training materials, visit our web site or contact GBPSR at psrmabo@igc.org; 727 Massachusetts Avenue 2nd Floor, Cambridge, MA 02139; (617) 497-7440.
